Bremco on the road.....Living the Dream

Since the incorporation of the company in 1976, Bremco has worked in over 30 of the U.S. states. At the start of the business our customer base was much smaller than what it is today, being that we worked only in the New England states and generally didn't travel outside this region to provide our services.

Today, we go the distance. In order to meet the needs of our ever growing customer base we travel throughout the U.S., and on rare occasion we have even traveled outside the continental U.S. to fulfill the needs of a customer.

Our company goal is to eventually provide our services to all of the 50 states in the U. S. We aim to achieve this goal through hard work and dedication to our customers, so if you are satisfied with our service provided feel free to pass the word along...it is not expected, but always appreciated.

HOME PROJECTS SAFETY > QUALITY > OUR COMPANY > COMBINED/SIMPLE CYCLE PLANTS POWER BOILERS

If you haven't already visited our new website, (www.bremco.com) please do so, as I feel Bob Morse and Jolene Jennings along with web designer, Chris Metivier, have done a terrific job upgrading and making the site user friendly. New highlights have already been added, which will continue to be posted on our website as projects are featured. See figure below for most recent projects uploaded to our "Projects" page on our website.

**Please note that these highlights may not always be featured in our periodical newsletter so be sure to check back to our webpage every so often for updates.

Dismantle a 15 Mega-watt Biomass plant with traveling grates to be shipped overseas.

Job Photo Collage

Weld Test

Filter House

Ductwork

Blow Down Separator

Access door

Outage Work

Expansion Joint Boot Installation

Meet the Faces of Bremco

Phil Predom has taken the leap to become a full-time jobsite Superintendent. He has been working with long time Project Manager, Phil Shand, in a mentoring program developing skills essential for on-site supervision. This program benefits those involved, particularly our customers because it allows Bremco to provide a better service by ensuring our employees are fully qualified for the job at hand.

Deane Hartford has joined our Code Department and is working with our QC Manager, Dan O'Gara, in a very active mentoring program as well. He has been diligently working toward obtaining his CWI and getting up to date with code regulations in the industry. Furthering Deane's knowledge base will enable Bremco to better support our code involvement across the board.

Rory Murphy originally came from the field where he was a key Boiler Maker Foreman. He has now been working side by side with Dick Grace, our Estimating Manager, in a mentoring program to further support our Estimating Department needs.
